

# FIELD-LEVEL INSIGHTS

Powered By **Data Science**

CLIMATE | PRO™

**COMBINE YOUR EXPERIENCE with insights from Climate Pro™, a powerful decision support tool that helps you make more informed decisions.** Climate Pro helps you stop problems before they impact yield and improve efficiency with smart, field-level information — all captured in one place so it's easy to share with your trusted advisor. Insights from Climate Pro build on the field intelligence provided by Climate Basic™ for a feature-rich, decision support tool.

## Climate Pro™

N

### Nitrogen Advisor – Advanced Tracking

- Prevent crop stress instead of simply reacting to it
- See field-level nitrogen supplies based on applications, crop stage and weather, along with how much N crops will require
- Explore custom scenarios to determine the smartest amount of N to apply and the best time to do it

F

### Field Health Advisor – Informed Scouting

- Use in-season and historical field imaging to evaluate crop health and identify issues before they impact yield
- Prioritize scouting activities and save time by identifying which areas need your attention before heading into the field
- Get a new perspective on how decisions are impacting crops and a head start on planning for next year

- **Field-Level Weather** – future radar, real-time conditions and 30+ years of historical data
- **Notifications** – automatic, customizable alerts for precipitation and extreme weather
- **Scouting** – capture/share geo-located images and notes for things like pests and disease
